

The Swift is our internal door operator. With a tiny footprint, this operator looks at home in any residence. The brushless motor ensures near silent operation while longevity is guaranteed. The Swift can cope with internal doors where wind is not an issue. Designed to cope with virtually any reveal found, the Swift is as versatile as it is elegant. The Swift has its own fixing plate as stability is essential while the sightlines are kept to minimum.

## BODY FINISH

*Satin Anodised Aluminium with grey end caps*

## DIMENSIONS

*Height: 60mm  
Length: 420mm  
Depth: 74mm*
